Just for you, every month a presentation of rising artists whose artistic projects are amazing.

Today an artist who is both elegant and surprising :

B.E.L - BREYSSENS ELOISE LEGA

I will have a thousand things to say about this incredible artist. It was first an encounter, then a travel through photographs and videos. She tells us about existence, especially about people, the forgotten ones, the disappeared ones, the ones we no longer see, the ones we no longer look at.

With the installations of her so poetic works, each time it transports me into the discovery of stories in another world.
It would be tempting to say that she tells us about the past...
For me she tells and creates, installs in the present what has been.
A young artist with a university artistic background in Digital Arts and Engraving, who is already quite surprising by the profusion of her quality artistic projects already realised.
A multi-disciplinary artist... always in research.
The artist's book in exploration, the archives, the volume of sculptures in her installations. She is filled with great curiosity that seems to have no limits.

Her work is truly to be discovered. And with a news story today because here she is... yes!

Hainaut Prize for Plastic Arts

...after having submitted her candidature, she is now among the laureates of the Hainaut Prize for which she has been selected.

The inauguration and Proclamation of the winner of the Hainaut Prize for Plastic Arts 2020 will take place during the Inaugural Weekend on Saturday 3 October 2020 from 3 pm to 9 pm.
A proposal to take part in a moment of life in the museum for young and old, full of imagination and ramblings. During these days dedicated to creation, the projects of the artists who are candidates for the Hainaut Prize for Plastic Arts will be revealed, in dialogue with the venue, as well as a selection of artists' proposals that will present an overview of current art in Hainaut.
